

**REMARKS**

The Office Action requested Applicant to make an election and hereby Applicant elects the species of Group (a) with Claims 8-37 and Claims 68-75 reading on the species.

Applicant reserves the right to have the other species consider if a generic claim is allowed and/or file a Divisional Application on the non-elected species.

It is believed the present election and the listing of claims properly includes bivalent europium, bivalent manganese, trivalent terbium and trivalent europium within the generic claims elected in Group (a).

Applicant wishes to bring the attention to the United States Patent Office that Applicant did not receive the Office Action of March 11, 2005 since it was sent to a former address that is three and one-half years old.

Attached hereto is the change of address that was provided in the parent application which by Patent Office Rules, would be applicable to every divisional of that parent application. As also can be seen in the cover letter of this Division Application, the address of 1920 Main Street, Suite 1200 at a new law firm of Snell & Wilmer was listed consistent with the recorded notice of change of address.

Applicant only found the present Office Action by monitoring PAIRS when it had not received the Restrictions Requirement in a timely manner.

The undersigned attorney additionally has now moved his offices so that Snell & Wilmer is now located at 600 Anton Boulevard, Suite 1400, Costa Mesa, California 92626. A change of address has been filed and one associated just with this Application is attached hereto.

In view of the mistake of the United States Patent Office and the failure to deliver this Restriction Requirement, it is respectfully submitted that this Response is both timely and should not be subject to any requirement of paying for extensions of time.

If there are any questions with regards to this matter, the undersigned attorney would appreciate a telephone conference.

I hereby certify that this correspondence is being deposited with the United States Postal Service as First Class Mail in an envelope addressed to the Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450 on July 27, 2005.
